## PROJECTS

### Technical inspection of vehicles

This app provides opportunity for managers as well as for mechanics in the inspection company Ada to make their business easier. It also provides customers to see a basic information about Ada company and allow them to make reservation of their car technical inspection, by sending an email or making a phone call. Used Technologies: NodeJS, MySQL and Angular.

### Web app for classroom reservation by faculty staff

Technology used: HTML, CSS, JavaScript on the front-end and NodeJS with MySQL(Sequelize) on the back-end.

### E-commerce website (office material)

Classic e-commerce website is developed. It makes general order easier. Technologies used: HTML, CSS and Vanilla JS.

### Movie library desktop app

Desktop app is developed and can be used as traditional video library. Technologies used: JavaFX with SQLite local database.
